

Invitation

LDP-centre cordially invites you to

PREMIS tutorial

LDP-centre has managed to engage people with eminent knowledge of PREMIS for a tutorial in Stockholm. We wish now to invite you to this tutorial, covering the creation and management of preservation information.

PREMIS stands for Preservation Metadata: Implementation Strategies.

Metadata plays a vital role in enabling the effective management, discovering and re-use of digital information. Preservation metadata provides provenance information, documents preservation activity, identifies technical features and helps in verifying the authenticity of digital objects.

The PREMIS Working Group released a Data Dictionary for Preservation metadata in May 2005. This is a core set of metadata elements recommended when using any kind of preservation repositories regardless of the kind of materials archived and the preservation strategies employed.

Time and place

The tutorial will be held Wednesday 7th and Thursday 8th of March 2007 at Piperska Muren, Scheelegatan 14 in Stockholm. We start with lunch Wednesday at 12.00, and finish the tutorial about 17.00 on Thursday.

Target groups

The target groups for this tutorial are archivists, librarians and IT-managers. These groups will together create and manage metadata for long-term digital preservation. PREMIS is a model for creating and managing metadata for long-term preservation. We wish to invite these groups into a joint tutorial.

Language

The tutorial will be in English.

Lecturers

Rebecca S. Guenther, is Senior Networking and Standards Specialist at Library of Congress, USA and chair of the PREMIS Editorial Committee

Steve Bordwell, works at National Archives of Scotland and is a member of the PREMIS Editorial Committee.

Olaf Brandt, works at the Goettingen State and University Library and is a member of the PREMIS Editorial Committee.
